mj1-00:07

That I told my wife. So they crank that up. I heard call my number five right out. And that phone, that was never registered on record. But theoretically what happened was that you got through one operator and getting ready to ring mine it up the exact moment I, my daughter plus miles away, I knew she was very ill react. Well the funny thing was that she, you remember that he was dead or Oh, it was years after died. Years after. No, I, she knew the father's death and his family had the same reaction. He tried to keep him quiet about it. He says in his book, told him not to just cause Yeah. Made him angry that he would say things. Well this is the thing that goes through your head. You, it's only case of emergency. What I not saying reading thing. You're out after the understanding of own.

mj1-04:13

You're not reading the books on real psychology. Let's say scientific psychology, chemical, chemical psychology, bio. I what a lot of this stuff you read about s fair tale better than it gives you a little punch. Punch. But something happens. People have ability. But you read deeply enough into this coming out the last 20 years. It's utterly amazing the revelation. And then also pick up this stuff when you run into something because the gets it. Charles works, one of the guys a couple years ago, I have a back of information he never missed. He just saw same you'd see and drove mother born on the west coast to the he how'd you know, told, they talked over, discuss it. Said, of course the gangster figure too then the needle. But that needle went work run.

mj1-06:43

But he lost that incident. He lost it. So here's what happens when you read these accounts, say bs, but if it isn't, then you find that these stories have called the denominators. This is where the science, this is where the science, how did that boy get that way? When did it and when did it cease? Cease brother said didn't understand. So you start to learn things and these things start to pile up. Common denominators pile up and you say, Hey, we've got a formula. We've got a formula. Think grow rich in his life. Think grow rich. The guy gives a secret book.

mj1-07:45

But you have that your fingertips, you writing on this, you should have a folder full of typed out quotations from the on how to get what success looks. The whole picture. He says the whole picture isn't just common sense biology, biological process. I feel that there's too many, I don't know, I don't know what you're doing. I dunno what guys going where I live. There aren't things you learn. You learn. Tove Magazine, denominator there. Learn about psychology. I believe this. If a person can get, don't just say I believe this. There are many men who have said it

Speaker 2

mj1-09:36

And tell the little stories. I saw guys speak up at in class or physics class from a graduate PhD from Columbia Mechanics, all stuff. His professor ou. And he gave, the title of his lecture was Quantum Mechanics and the Soul. And his ultimate conclusion in the lecture was that each of us has an observer, which is passive. And that we all hooked into God who's an active observer. And he was under the observer psychologist. So after the lecture we had a little coffee tea and I said, there's a bookout called the Psychology Observer. And he was really fascinated. So I got the address in True Disciple,

Speaker 1

mj1-11:04

Nobody way in the family going to be this.

Speaker 2

mj1-11:16

Well he read physics, he too much and he read, which is the next book by the do physics. Same right book. But he heard better things about this other book than he did the Dow physics. But they're at similar conclusions that

Speaker 3

mj1-11:55

Tell you a book that summarizes a lot of those discoveries or trends in science correlating with philosophy is that coincidence little book. It's sort of like the history of the argument kind and psychic phenomena. He covers a lot of the big names and science and where their ultimate thinking led to full circle.

Speaker 1

mj1-12:32

I was taking over all, I think in science Einstein years ago to, you can't get into all that in lecture. You don't dare you mind you have talk Apple. Jesus was a right, right. The powerful. Yeah. Right. His whole style. Well this was in that part of the world to this day story. All biggest part of their moral, their philosophy, decisions, always anecdotes and jokes. I think there's nothing more effective now on a one-to-one basis or

Speaker 2

mj1-15:32

This Campbell workshop, something this church every Wednesday has about 40 people every Wednesday. And he reading stories of from the Sufi book, that's the thing. There's no talk, didn't just work, exercises my father,

Speaker 1

mj1-16:48

All those things that he'd get off a week six. And he wasn't saying he knew, he was expected to themselves down six days.

Speaker 3

mj1-17:56

Well,

Speaker 1

mj1-18:09

I want to hear more about that.

Speaker 4

mj1-19:13

Well, I suppose I hope that I can communicate what I wanted to say people without making

Speaker 3

mj1-19:32

Yeah, the boxes.

File mj2

Time: 22:10

Speaker 1

mj2-00:00

Collection of relevant one. The other thing of course is possibly asking some questions. Each person do that. Mr. Rose, one thing I thought about was if you ask other people, they may pick up things from other, like when we did it the first time, everybody wrote down what they thought. The only reason I say that is because then you've got something in front of you you can look at after you get the information. In other words, if you ask me and I say something may contribute to somebody, I don't know. I thought about bringing pencil and paper just for the idea of what does direct ability or direct mind science mean to you? What is it? How does it plenty? And then you could ask questions individually. We got paid for here. Tim,

Speaker 2

mj2-01:40

Up fridge.

Speaker 1

mj2-01:46

You got any extra pencils or pens? Upstairs? Pencils. Is that some of your paper on? I have a whole bunch upstairs so I can do these Signed. No, it's just your own. You got some paper. Paper there. I works. I've got some pencil upstairs.

Speaker 2

mj2-02:55

Eye's Eye out of Levi's secret doctrine was alleged that the force had come from the PI level

Speaker 1

mj2-03:07

Army. This is an interesting thing force. This is an old Tracy origin that the physicist used. It implies that they had some knowledge of this ancient, I actually Genesis of the word laid back and it that they sense that there was a power that people had. I don't know. I haven't run it back myself. That'd be interesting. That's where I saw

the reference, right? Well yeah. You'll find it though when just whoever bore. I don't care if I get back. Depends. I'd really like to back.

Speaker 3

mj2-04:13

How about the cigarettes? Yeah. Us. I want back after their smoke. So who needs anybody

Speaker 2

mj2-04:29

Else? Those points? There's a point. Sort of a little point. Good cat.

Speaker 1

mj2-04:46

Anybody else?

Speaker 2

mj2-04:57

Anyone else? Okay. Give me a little. Yeah. Anybody else? Anybody else? Anybody want book the right on seat now

Speaker 1

mj2-05:18

Gordon. I, okay, that's

Speaker 2

mj2-05:51

25

Speaker 1

mj2-05:52

Words or less. 25 words or more. What's the question? What is direct mind science? What is direct mind? How do you understand? What is your understanding of direct mind? I had one other question that Mr. Rose, I said can it be developed or is it a natural gift? And if it can be developed, how often one enhance or develop this directed by the building.

Speaker 2

mj2-07:04

Anybody needs to seat. Here's an extra seat.

Speaker 1

mj2-07:14

True. Like I said, intuition is direct mind ability. Well, yeah, but what's direct mind that we were defining

Speaker 2

mj2-07:36

Rather than saying that direct mind is intuition.

Speaker 1

mj2-07:39

That

Speaker 2

mj2-07:39

Intuition

Speaker 1

mj2-07:40

Is ability. That you have capable direct mind of contact. Do you have any mind? You're not capable, you mean? Well, a person has a direct mind also has intuition. He doesn't have intuition. They'll never have direct mind.

Speaker 3

mj2-08:19

On the other hand, animals have direct minds. They don't have intuition because they don't have a computer that logically analyze things. The ones I talked to did

Speaker 1

mj2-08:45

Knowledge. Being sure of yourself, point of knowledge, form, know there's no doubt about it's form. Okay. But yeah, this is what I'm saying. Achieve that knowledge to be able to be to know has a lot to do with it. We're saying, I think from what you said, Mr. Rose, there is a difference between intuition and direct mind ability. That's the, that's more or less the question. See he defined it as being the direct mind, being intuition. And my question was, isn't there a difference between having intuition and having direct mind abilities? That's more or less what I was saying. You can musically kill an animal.

mj2-09:56

This is what I'm saying. There's a whole field of things attached to it. Now see, this is what we're getting at afraid. It has been in your minds here, people have been limited in the understanding of it. Possibly a way of saying that move on. There's a way of saying this as what direct mind is. It includes this direct mind to a dimension which transcend individual contact this or allow to be free from total identification with an individual mind and thus cause changes to occur in others in the physical world. Miracle to this volume, focus of attention, conservation of energy. And the first

Speaker 2

mj2-11:25

Part,

Speaker 1

mj2-11:25

If you

Speaker 2

mj2-11:25

Look at it as a mind dimension from which

Speaker 1

mj2-11:29

This world springs, you can contact that

Speaker 2

mj2-11:32

Dimension.

Speaker 1

mj2-11:35

You can cause a change weld. This is

mj2-12:16

A passive faculty. What goes on, we don't really know. In some cases we suspect electrical generosity. You pick up. Were tremendous going to now we originally we've got two. Ch talk was planned for June and August. June talk was 19 and 20th, which is a little later than they have been in. We did that for a couple reasons. We thought maybe there'd be less conflict with people who have kids in school have a moment to the picture of. And also we figured all the rain will be able to that time. So we decided on having the dock was in the summer. We also had the bright idea that maybe we should have some talks in various cities where we have cat groups or cat people to help encourage attendance at the Chicagos. And the original idea was to have those talks as mainly a lead in or promotion for the summer Chicagos.

mj2-15:07

But as we got into it, I think what's happened is that what we want to do is present the speakers on their own merits for all of those thought. So some of you've probably seen the flyers. We've got several thousand here in the room, which we going to distribute later. But we're giving talks in Akron and Cleveland, two talks in Cleveland on the east and west side, Pittsburgh, Columbus, Baltimore, and Washington DC And we're going to have, most of the speakers are going to be giving two talks. They won't all be one speaker in a city. They're going to be ing Dave Gold, Frank Mascara, and Jake.

mj2-15:58

And what we want to do and what we have done, the way it's presented in this flyer is to present these speakers as experts in a certain field. And I think you'll get that impression from reading the choir's been prepared. We tried to, after talking to the guys that he's volunteered to speak, their subject matter is geared towards what we consider to be their particular experience and expertise and knowledge in a certain field. And each one of 'em comes in from a slightly different angle. But at the same time we're hoping that there's going to be a common theme to all of these. And of course all of 'em are also going to be tied into the common theme or the summer

Speaker 2

mj2-16:53

End of tape. Well, I think maybe it'd be good if each one of the speakers just said a word too about what their talks are going to be about, where they're speaking and what their talks can be about. Just the

Speaker 1

mj2-17:09

Thought we saw.

Speaker 2

mj2-17:20

So Jake, why don't you tell us a little bit about yourself, where you were born, what you're talking about,

Speaker 1

mj2-17:27

Where you're talking.

Speaker 3

mj2-17:36

Okay though. Alright. You're talking to

Speaker 4

mj2-17:53

Talking in Canton, in Akron in, and basically my talk's going to start out with a critique of psychology. Go through the gross psychological society working into men and women's psychology and plus mix a postulates about what we call conservation therapy. And they both worked from men's brains, different evidence, met into some things on brain research, then into what is mine? What's the connection between mine and in brain, what's the different theories on that? And from there I'm going to a perception and what you see out there is actually in your head. It's not actually out there. Then going to paradigms create how you create your reality from your concept structures. And we try to work into a theory of psych phenomenon, like from working from how you manipulate the paradigm or your concept structures and ties in with phenomenon. Like a lot of area. Get all

Speaker 2

mj2-19:28

That from three. I told him about he has to cut it for two hours of one hour.

Speaker 4

mj2-19:43

I only had 15 minutes for the talking

Speaker 2

mj2-19:50

It up for question. We're okay. Excuse me, is this she me? Questions, other questions and answers afterwards. Open it up. Yeah, we're going to get back. That's a

Speaker 1

mj2-20:02

Second half of our program here. But the one thing that course we're going to do is be selling tickets in the summer. These lectures, the whole program has to be designed, so that will not be important. We'll discuss the techniques of that later. I'm speaking on the possibility of men's duplicating mental processes using computers. It's a field now, it's called artificial intelligence. And basically it's the question of whether or not men can duplicate the mental processes using hardware, electronics and whatnot. And basically what the presentation will be about are different scientists, the current level of investigation and different theories they have on how the brain works and how they're about to try to duplicate that using electronics. There's a lot of very strange theories and a lot of them come up with conclusions. They all seem to think that they haven't reached any limited, but they always have a view of the human mind, which is so transcendental that it seems almost impossible for them to be able to with it. The idea that the human mind is able to get an overview of itself, whereas a computer can never see an overview of itself, can never build a different perspective.

mj2-21:39

Just one. The idea that there's some anterior observer, several writers have alluded to this, so many different varying words that are very, very similar to the psychology of the observer. Just uncanny some of the similarities and yet they never really say as to how they're going to duplicate that. And that'll lead into the what I.

File mj3

Time: 21:34

Speaker 1

mj3-00:04

Necessity for a science that's based on experience or what I call subjective science and this as opposed to the current objective sciences scientists tend to be very objective and very impartial investigations, but when you really get into investigating how the mind works and being able

Speaker 2

mj3-00:27

To pigeon all the different types of experiences, you really find out that objective science is totally hopeless as that. Only \$2, no. How will this time direct mind theme in the whole summer? The thing that ties it in is this idea of experience that the only thing that anybody knows for sure, the only thing that you're certain of is your experiences

Speaker 3

mj3-01:07

And yet science can cope with that and when you talk about a mind or somebody experiencing what is this, how do you duplicate this process of experiencing

Speaker 2

mj3-01:18

And the experiences aren't really what I'm saying. The only thing that you can really face any kind of anything on that is basically experience. Experience what comes, what you perceive or what you think. Alright guys, you're right there. The qualification of it something that first 10, that initial experience, it's totally undefinable in terms of science. How do you duplicate that electronically but then who is experiencing that process of experience know itself anyways, it'll only be \$2. There's the real Bill King.

Speaker 3

mj3-02:35

We were just going through and having the speakers to give us a little bit of idea about where they're going to be talking and what they're going to be talking about. So it's your turn.

Speaker 2

mj3-02:46

Want me tell you about the three stitches before I Give me a little time. I appreciate it. How about you?

Speaker 3

mj3-03:03

Okay, I'll tell you what I'm going to be talking about while with these guys group, I'm talking in Baltimore and DC in a couple of weeks and my talk's going to be probably the least esoteric and it's direction and then it's going to talking about success and the way to obtain success to different principles of success and the basic theme's going to be that in order to be successful you have to be successful on every level of life. You can't just be successful in your career and your family or even in your philosophic work. You have that direction but you have to tackle everything the same way and using the same principles and I'm going to present the direct line sciences of the system that has these principles to show how they work for us on a mundane level, on a physical level as far as how we've been able to be successful in our business and then also tie some of the different incidents that have happened in the group and Mr. Rose and spice it up. A lot of penitentiary. Dave's going to have our

Speaker 2

mj3-04:13

Bank statements on transparency put on overhead projector every month making one more money. I get credit this out,

Speaker 3

mj3-04:43

But how this is going to tie in a direct mind is it is going to be that some people

Speaker 2

mj3-04:51

Here talking around the group, they'll mention how this direct mind necessarily corresponds to success and I've even heard some people say possibly see this as being you that you could use direct mind as a way of being successful. How would you answer that if somebody says,

Speaker 3

mj3-05:12

Is this thing supposed to be spiritual or is it good for your business? Well, it depends. The basic theme's going to be that regardless of what you want to succeed on, this is the most tedious way to do it. If you want to make money, you can't do it with your inte alone. You're going to have to find certain principles where you can tap into something higher because if you're going to be successful and overcome everything that's going, that's going to present all the obstacles, you're going to present it to you. You're going to have to tap on more than just your rental, just more than you enter power. Even in the business world, you're going

Speaker 2

mj3-05:43

To have to have a computer that increasing numbers. Millions of practice goes through everyday life.

mj3-05:59

There's millions of factors you can't logically. There was a guy who had an down in Texas and 600 and these were people coming in to learn how to sell pots and pay and I know one guy, they interviewed one of these guys taking this before and he hugged me guy and he said, what do you think of this guy? He said, most important guy next to Jesus Christ, that's word for you. Of course he was acting and all that, but this guy, his idea was that you accept God principle or something and it keeps you on a certain course of people know what to expect out of you. You're not going to steal from them. You're not out there to steal. You're out there to produce a service and you hold your head a certain way and eventually the public gets the idea that you're dead serious.

mj3-07:12

You're going to serve, give them something money. I presume that's part of the angle. They likewise think maybe a magic comes down. I thought that was very important because it was the first time I ever heard that it wasn't a denominational talk. This guy wasn't any religions like alcoholics anonymous, spiritual savior to be from alcohol and it works. This is statistic drunk that get away from it. People who went Jesus pledge somehow

I think of course what interferes with a lot of people in your businesses and whenever you make up your mind that your ego to something else, then ego. Egoism is offensive. Is it like displacing your ego on another figure like onto a Christ or something? It's dedication. Yeah.

mj3-08:43

You have to be within yourself that your attitude. You never tell them they weren't fucking tell people that they would prove it. They were, they were hundred and then things started to happen to them and wasn't as mysterious as you think. People look you over on the door, they look you over. If you've lar the best you can help them out, help yourself out. That's hard. I think it's just an attitude that rubs off on the public and it has to be real. It can't be something you're going to put on, but I think in those, when you let yourself down to any frame of mind and don't try to shift from the coming person to the honest person and back to the guy that's going to his through next thing going to be aian, you're not going to be anybody. You're going to be going to be flopping around between careers and Johnson and people like that right now they're not moving.

mj3-10:18

They have too many objectives, too many objectives all works but yet their objectives are scattered. You can have many objectives. They all, they no conflict with each other. Your spiritual search don't conflict with your business. It'll help your business, but you have set a priority and that was the name of the game that this guy put across. This was your priority that you had more or less a and you said that would help clean the cell and help them get what? These guys didn't mind giving the 600 parts. They walked out, they were, see I said this years ago, this is a new psychologist. All it means is his words, the proper language. He told that guy put it across and he put it across just the salesman. I believe the psychologist on have psychologist don't have this message.

mj3-11:32

This s when he says that, well how this would tie into use his mental power that he had pick up things. He said, I thought it was kind of outrageous maybe in my point of view, but maybe it isn't. He said even people that have avoid accidents because that was like sort of what said he said that what keeps a guy, why does a guy that is supposed to go on an airplane all of a sudden turn around before he gets on to walk back out and in the airplane crashes. He says, what is it about that guy? How does this happen? Bomb. No, he says that's an ability sensitivity or you want to call it direct mind or intuition, but he's able to pick things up and it just maybe on a business level too, if you have the right kind of mind, you could see where I got in. I

Speaker 3

mj3-12:51

Sometimes your best friends,

Speaker 2

mj3-12:59

Sometimes you can sit Lebanese, Greek, Greek. You can sense things that are going to happen to you. To me, I thought that was kind was a brash statement. He was sort of condemning all people to get into accidents or do things wrong because they don't have the proper mental perception. They don't have this feeling that he's talking about that they pick things up. You think he was condemning? I got the feeling that wasn't condemning him. He just saying that that's a fact, but we have all this information's available.

Speaker 1

mj3-13:49

I got the feeling that he wanted to sort of hit, drop the hint that he wanted to save mankind by giving him insights or teaching him to have that direct mind ability so that it could avoid accidents, avoid wars. I was wondering what was his thinking

Speaker 2

mj3-14:13

About? He thinks everybody has that power. Just everybody could see a bad business deal or see a proper move in their life. If they had, they could learn to listen to their feelings. You wouldn't avoid things he tell you that who? Sed? No. Well that's just a book I read. I don't think he was selling too much anything. I seemed like a pretty sincere person. This conviction. Talk about what you're going to talk about.

Speaker 3

mj3-15:11

Just to sum up something, I think the main thing is you got to practice between us and you have to find a word for it. A language for it. Whether it's going to be on the mundane level. Well you see the between. This is something that comes after this is what you

Speaker 2

mj3-15:26

Recognize actually there's a certain way of light that impairs the person. In other words, body chemistry, intuition, we were talking about this earlier, formed in and recently it's only found in the brain tissue itself in the membrane and this I think just the discovery in the last decades. Decades that it's the foundation and basis of I people for 10,000 years that they protected for magical rights. Also education and getting certain old athletes. There's a lot of things that can be, this entails people want, the thing is they don't want to respond. What I consider the dream that they into into a certain dream of enjoyment making come true. They make themselves come apart, eventually fertilize soil to make a mark. Everybody's going to fertilize soil. Make a, before you fertilize the soil most out of your energy with the use, the amount of scar.

mj3-17:27

This is the point. It's funny they said about boxers just this about a month ago that they talked about the fact that they used to conserve. They didn't sleep with their wives or the guys that were married sleep with their wives while they were training back now. Yeah, that's what I was going to say. This is the new age I predicted 10 years ago. There's only going to be a handful of people in this country. It's going to survive the sanctification of perversion, sanctification of all sexuality, any sort and the thing is everybody's, everybody else can treat the other public sweet and the result is this. The younger generation, one time certain religious that's going the board does all the nuns and priests, not all, but so it discoveries I think are coming in a good time. I know now that there's no athletes. You never hear of them an being retraining himself. They're coming out with evidence. You produce evidence on either side. You can always bring out an argument. Here's one guy that you can stimulate yourself, stimulate themselves out. The whole system was that, oh, that was Jack or that they asked him about that

Speaker 1

mj3-19:47

Said when he went in, he just went nuts.

Speaker 2

mj3-19:58

Was that the guy the girl was dating on? He was real jealous and she wasn't having sex with her and he was always, remember I saw that movie. I thought what they were trying to portray in at least movie was that he was really jealous because he was settled. You get that? I didn't see the movie. I just heard read about it. He was, yeah, and he said that it seemed like that's what they were doing or Pok being it. Well, anyhow, this was again, I guess from beginning of time of reason the walls seems maybe that people were more intuitive or had more of this knowledge about what you're talking about years ago where before the technologies.

File mj4

Time: 16:11

Speaker 1

mj4-00:07

Reason the walls, it seems maybe that people were more intuitive or had more of this knowledge, but we're talking about years ago maybe where before the high technologies and what's happened is you've got a lot of high technology now and people are engrossed 16 hours a day. We got all kinds of damn gimmicks, but you still work 16 hours a day and the bureaucratic mess is putting, it's good so that you've got to work about 30 days out the month or maybe more the cop on the corner time you, he must to your car away or he wants to find you to cross the line. See, everybody's out to grab the working man. You hear this in Congress today, the Democrat, the house, he wants to bring out taxes but there's no they know at the same time the millionaires, the big corporations, those people are being subsidized to pay taxes. They are getting subsidies. We're buying people. We we're bribing people, south Central America, but all the time as a little guy is going to be kept so damn can't.

mj4-01:31

Your only hope is become a millionaire. You a millionaire era. You're on your way to becoming a aire. So the most visible, I often thought this, jeez, these Rockefellers and people in a wonderful position just into their library and read those books, relax and have some account that take care of their business. You think they'd do it? Hell no. You see how they go, the guy that supposedly was the richest man in the world or ask him says, how much money do you have to make after he's made so much? Just a little more, just a little more left.

mj4-02:30

It's always just a little more. They have a wonderful opportunity and also to do exactly what they want do and educate their children. They do chemistry, come into the basement, some chemistry, do experiments, anything they wish they're out trying new sexual perversions or three Jack Kennedy, 1500 in the White House. There ain't nothing wrong with him getting killed. He him happy so much. The whole thing is I can, the mistake that I made in most of direct approach, nobody in a lecture wants to be told they three chickens and one the public generally likes to these people, especially on the west coast, they don't say anything. They don't basically say anything.

mj4-05:12

He never opposed anything, anything. And all these people who are making millions on our so-called adults, they're, whenever you put your touch sensitive, I start to, they'll sit there and they not pay any attention. Oh, once they'll catch it, understanding wider, see look desperate way out. They jump up and then make it out the door because this is no good to have to along these you don't STAs. I believe that these correlations, I'm talking about all sorts of on businesses possible. Once I get more, I find out that it's the end just like you up and talk about S you can't talk about yourself and everybody in the group could be talking about themselves to a certain degree too much about themselves.

mj4-08:09

He was, people will listen to that. He hadn't the real rock. He was fairly un when was four up beyond doing public speaking. Hold them and then you're dealing. Then the next time you get back you'll come to here. You get then another little firecracker. You can't give revelation but I think you can is put together to solve. It's a combination of, I watched this guy on tv, his presentation in, he was an emotional speaker. This somehow don't anybody, it's a funny thing you'd to church every one to church. Church and you know what they do in there? They get up father, but he could use those 50 words backwards and pull it upside down inter arms around. He was very em.

mj4-10:50

He gave a bible verse out, tie, repeat himself 10 times, repeat the same phrase, shouting the thing was held the attention with that shena and he was holding the attention and then the I through ahead. Maybe that sounds reasonable, but you start to become involved in the state of mind. Your state of mind is to merge with and guy seems sincere, absurd, but they don't say anything. It isn't what they say and that is it's all what they project by virtue of a great, you might say hypnotic flurry, waving the arms, jumping up and down and saying emotional things about Jesus and terrible things.

mj4-12:13

But I think the most effective thing is there's a lot of literature. You guys are not picking it up. This is thing, there's a lot of literature on what we're talking about and I am real with some of these. I never C brain ries. It has a lot of this stuff is validating intuition. Thousands of thousands of years of people philoso. This is validating their lifestyle and their power to produce miracles, power to do certain things. You see, it's limited. It's limited. All this energy in the direction of, I don't think that this is absolutely necessary. Of course, I think one thing more important, another person project in the mind of transmission, only one do prophecy and they just sit, look into the space time continuum and give you reading.

mj4-13:35

But again, I don't see quite the need. If your mind should function in any direction, anything you should do. In other words, when you read a book you should be able to see and about going down the desert, they down the there they would walk and look at these old statues and try to visualize what happened there type of people lived there and what they, and of course whoever was their teacher was trying to call forth their intuition with that proper intuition. They have a direct mind of view of what was going on. Piece the culture. This is one statue that can reproduce the whole picture culture. Well that's does that. I've seen people do this Inva, Ohio Road to Pittsburgh. I worked in a roadhouse as Taver steak house and there was an nobody, he'd a break. He told me he had the ability to amazing. He said, well, I demonstration, so I gave him a ball point back in the.

File mj5

Time: 30:26

Speaker 1

mj5-00:04

It's because they don't really have a perfect, they got it perfect to say no, but the person thinks, well I've got a feeling I join the marine. My intuition is that I'll be successful. Or maybe some idea glamor, some uniform or whatever, but these intuitions may be, I big part of it are subject to anger. The only deal for instance, I know that lies about their husband. They almost, this is tied talk about, it's tied to some mundane ego but yet it works out tremendous anxiety. That tremendous anxiety sometimes brings about, it does experience too, which will bring you to mind but that's only after this age are gone. The ESP is something that you can practice that only it'll be limited to some extent. It's a higher mind type of operation. It's tele, it's like a mentality to table is it looks like direct mind but they discovered its shape even by using a simple piece of cardboard like this and put it under the table with different places.

mj5-02:01

The table dropped a whole bunch of series found out exactly which an angle went up under the very center of the table into intelligence to pick the very center of that table to lift straight up in the air. Now that's physical but somebody think that's strict. Fine. There are a lot of things that people can do. There's an energy that you can heal people. Here's the difference. I maintain that Christ heal people with physical energy. That's called actually project sympathy and desire. A nurse could work in the hospital. Nurses are told don't be sympathy towards your patients. You get that's a transfer of energy, so that's healing. That means direct. My healing has no loss of energy and I mentioned this in one of several of my lectures about talking to a fellow up in about and Ambrose out

Speaker 2

mj5-03:23

Dead

Speaker 1

mj5-03:32

Guy and I said I got a feeling that they use some type of healing, which a conventional that you see where people lighting their hands on other people and taking their, didn't know anything about, he'd run a old machine shop there, he read too many books. Absolutely, but you have to be able to somehow tap that. You have to be able to somehow use it. Now both words are bad. You don't use, it's like saying that you would use the ocean to prop a boat.

Speaker 2

mj5-04:35

The ocean going to stay right where it's at car because the boat went

Speaker 1

mj5-04:46

Sail. In other words, the direct mind when it's working is a effortless thing. It corresponds to an old istic law. I understand. I used to put books imagination to what you want. It must not be

Speaker 2

mj5-05:56

The direct line, just that's what happens because a person has ability to reach the higher awareness to the illusion or something doesn't mean that he can affect direct mind. Right. He's not charge anything. He's not,

Speaker 1

mj5-06:16

You're still a unit that help but you're able, like I said, the of out here generations of the trees out and plant, drain and change the field occurrence of the field because there's a limit to what they're allowed to do in a lifetime. Many, there's a limit but they try to go beyond that. It's the story of the old drop dead flower. Try to push beyond it. You drop dead and the same way it's the actual use of it. It's not more than, like I said, a demonstration to perhaps encourage somebody else to their entire mind. This is the most valuable part. It's certainly commodity.

Speaker 2

mj5-07:27

The only value human life people on the ladder. The ladder. This

Speaker 1

mj5-07:34

Is a law. It isn't that there's a value. It's like a reciprocating, right? Right. It's 10 million mines in the ocean around go nowhere. My wife 10 million mice. The mice consolidate and say here's how we can protect ourselves from the cap until we find out what the hell we are. Then 10 out of 10 billion survive who they're, that's basically,

Speaker 3

mj5-09:06

Would you consider it as

Speaker 1

mj5-09:08

Being technique? Oh yeah. The way you hold your head, you your head. It's not too complex. You

Speaker 2

mj5-09:32

Learn how to do it. It seems that you're going to develop a technique to will something and then forget it. If you bring it into being, that's going to make you

Speaker 1

mj5-09:51

Because as soon as you paused anything, you immediately negated. You linger with that negation. In other words, you say I want this and you want it intensely. I want them immediately used believe in the opposite. You create law. A lot of forces are accept action with repetitious hunger. Create the so have.

mj5-10:30

That's what we talking about between a way that you have to hold your, you say between what don't whats I think you understand what I'm saying. To give you an example, best way I can tell you is to give you an example. The first time that happened wife, I was sitting in a put hand on her head. Head. So I went over and I didn't even believe it was the idea. I thought when I went over put my head had impulse pull, the headache happened. Since then I've been doing, I thought you were of the, you say you put your hand on her. Yeah, I've been doing that lately. Headaches, stomach muscle and my hands get put my mind in the state of deep meditation

Speaker 2

mj5-12:33

That

Speaker 1

mj5-12:39

It surprised me though. I had somebody here day had a migraine headache and they didn't believe it. Migraine. Yeah. Well of course right now, see right now today I'm my bio rhythm way down, down intellectual low. Yeah, I remember you telling me about that before I, what you telling me about before put they say the hands get like what I do, I concentrate. It's the same state you reach when you go real deep beyond the mind and the body state of just, it's the same state. Only year 20 truth of the matter is, but there seems to be an energy there that like tuned into the universal mind or the universal force or whatever that pervades everything within and without, well that's the, I think what truth did you as a result of an impulse and that's exactly what I did. I mean I had no logical reason. I took home training for, I didn't believe it. I thought it was a bunch of nonsense. It just happened but it happened so many times, so many people here lately that I noted other people that this one person who I say came with the migraine and just like that and an interesting thing was with this young girl that rubbing her back out.

mj5-14:33

I had a chiropractor I used to adjust his back just anyway, her back is so messed up. I put my hands on her before I out and you got to do it with your fingers see and I would put my hands down the spine and process to see where the distort adjust vertical the chiropractor do. But I just was about ready to give up, said all, no, I knew it was going to take a tremendous amount of to get all that out, I had to really rub it and everything so I just put my hands on there and concentrated and put my mind at stake and they heated. UPT was all loose, all spasm.

Speaker 2

mj5-15:47

Looks like it's photography

Speaker 1

mj5-15:54

So much. We don't know. I think it right inside that box on the left, just reach down and get a couple of, how about you giving us what

Speaker 3

mj5-16:52

I have the everything attunement, the manifested mind in the development of metal powers mine and also the transmission. The fact the direct mine also being the directing mind, transmitting mine of getting scenery and changing the projectors manifest mind as far as the development, I have development being attunement with the manifested mind and type of light most conducive to developing, which in turn I, you have to have tremendous effort along with you have to have some way that you can push your limits and also the removal. What was your first definition? I couldn't hear it too much. The attunement with that which is projecting attunement, that which is project all projection. There was a question I was going to throw out. It came up when we were discussing this and this people trying to figure out, I think there's a lot of people in group about it. That's how this fits in with, I get some ideas about how this fits in with the rest of the teaching. How this fits in with the system, with the psychology observer. Whether this is something that is just totally new or whether this is something that

Speaker 1

mj5-18:41

One not only in terms of different word definition but more or less demonstrate. In other words, how do you demonstrate other people's writing? Baker is the work of the manifest. That's the basis of Christian science. The ability to change this dimension, which is not too real about mind power and she's not talking about the relative talking about changing. Actually changing is the same

Speaker 4

mj5-20:07

Position. I dunno if you not, I was reading something about him recently. His idea was trick use the people he was trying to heal. Anyway, his argument one that God was all perfect, therefore everything he created was perfect. Therefore illness is imaginary, imaginary projection of your imperfect mind. And if he was dealing with the above people that believed in the perfection of God, the logic of that would cause them their mind to maybe go into a between where they would it wasn't real.

Speaker 1

mj5-20:47

The difficulty is that that is he, while let's say biasly leading them, he's leading them with a lie and the result is that those people can never really know what happens. It may accidentally as a result of, but first number one is God remains un defined and the undefined God gets blame for everything that happens now. It isn't the imagination of people. This projection, this plea, that show is as real as everything you'll know until you know something better and after you know something better, after you're dead or after you look transcendent and look back, this is still real. This is still very real. This is real as a picture.

Speaker 2

mj5-21:50

Dimens,

Speaker 1

mj5-21:56

No your sympathies. When you die and you have any consciousness of your relatives, these relatives, seemingly I will still be the focus of your attention. I dunno when that would ever come about.

Speaker 2

mj5-22:32

The fact

Speaker 4

mj5-22:32

That an individual does not know who he is, does not have understanding of his own awareness and he attaches the people around him and his relatives and the loved ones and the people that he is living with, he attaches himself to those people. That means that, yeah, his whole life is not one of defining himself but more of being aware of other people. So when those other people are taken from him, he's

Speaker 1

mj5-23:11

Left with nothing. Even though those people become very deliberate from George Blazer said, we're all this together. In other words, we all believe all that you're supposed to go out and make a nickel for. We all believe not all this. There's a whole lot of stuff. We all believe that the sky is there and the sun rises and sexes and because of this you can't take one person by healing, by saying the true imagination causing this. The only thing qui could say in all honesty is God's imagination. He didn't say

Speaker 4

mj5-24:10

Imagination caused it. He didn't know what caused it.

Speaker 1

mj5-24:17

The blame is placed the upon. This is the thing. Warn Earhart, the individual. Scientology claims the individual. Christianity claims the individual. You're a sinner. Krishna's the individual. To me, this is nonsense. We we're all stuck with the same paradigm. Paradigm. Now you can't. You are one person. What I said by telling them, the guy that he is came back. This is not telling the truth, the reason we're not very popular because we don't have any collective. And of course that's the only reason you guys years. Other words, you can't trade one another, not police can't by God. I no consciousness. If you're not, you want to use the word I don't use it, but I think this is the thing that I don't know, even though I had this experience, what the hell is God going down here? Solution.

Speaker 4

mj5-26:04

In other words, why project somebody

Speaker 1

mj5-26:06

Down here for discover really millions, millions of peoples so struggle to find your way back to simplicity, complexity, simplicity.

Speaker 2

mj5-26:23

Wonder.

Speaker 1

mj5-26:29

Yeah,

mj5-26:39

Well I think it's even conceivable. I wouldn't want translation the way I was translated. And so they created a trough of their place. Creation, speed, tr of their, in other words, dichotomized themselves. Dicho. Again, when you transcend this dimension and you go beyond the unmanifest, the pure absolute reality, you may not be absolute reality as much as traveling there sort of naked about the body, the absolute use. You could be traveling there without it being contact with everything wasn't absolutely nothing. Everything I see I from that. In other words, absolute can be right, right. That's what I, all you can do is all you can do is be prepared. That's all that theory about we're entering this aquar hundred.

mj5-28:58

We have to go into the mental age and golden age and it's repeating itself from the time of land. Supposed to enter the golden age for another 7,000 years and a man is just coming out of the dark age. So every time there seemed to be certain evolved people that had Christ conquer like Christ or Buddha, but now it seems like these things are becoming more widespread, this universal forces universal mind population. But I do say that I think society things are happening today. A lot of this stuff on the mark. I guess nothing but hypnosis. They were happening. We had wave of this before all. Yeah, there were just fewer.

File mj6

Time: 30:16

Speaker 1

mj6-00:03

Right. The people

Speaker 2

mj6-00:04

That didn't let it out, I don't quite think the opposite are worse, better, more absolute lying alongside all this knowledge. Well, what's the great friend epitomized? Billy Graham gets up there, wants us to do this. What the hell? Would he know what he, he's talking about a first being that talked to him. I He's liar. Living liar. He did know I'd like to some details I like produce some details. He had a conversation with God. What say did he talk about the stock market or so astute, God's making mistake. He made a mistake back here about 10, 20 years ago. We got the atomic bomb. He was asleep while was making the bomb. It ire as hell guys that are so the word God. Yeah. All luck. Lot of people understand affirmative man wanted so many a fathers, so many Hail Marys. He wanted to sure a way to heaven but there's a lot of people that couldn't comprehend anything. Even different religions like Hinduism always had different things for different people. They had B yoga like the prisons used for Catholic devotion and they had what? Mosha was a higher type of yoga similar to zen or satori or the Buddhists had, there was different things for different people. Some people

mj6-02:32

Today says we were put here just like we put in jail and all efforts are made as soon as you come up with a religion, the truth of an honest person, Christ is an honest man. As soon as he dies You mean you don't think get beyond the human condition of grief and possibility and selfishness. Well yeah. We're entering now period of like Orwell's 19 80, 84 of player Ana by Kurt. I mean the whole system seems like the government's taken over mine. It's government. It's just that every time there's a mass movement knows another old thing.

mj6-03:35

Can't say there's only so many allowed on the earth that you got to speak out. Talking about climate, you get any great crusade example of a whole group of people that once they showed that they had a real power. People are scared of that. Right? Theism. The massacre mysticism is the system where people get together who one thing they have in common is that they just can't seem to get along with the overall society. George. They can or can. They're outmaneuvering. You got somebody we're hanging by springs and somebody's pulling the we're so they have more democratic system where there's more a system out there is all power relationship democratic system. I mean here you have more democratic than

Speaker 1

mj6-04:57

That poem that you wrote in the beginning of the book Psychology.

Speaker 2

mj6-05:06

Yeah. I thought

mj6-05:15

Yeah, we cannot, you're dealing with a mathematical problem that's reason you have to have a direct mind. Right. There must be people that are spiritually by the price that talk to ordinary people have ability to get in and beyond these other dimensions. Nobody can understand that they were at that level too. It's not really saying anything. I'm saying that there must be something beyond something we highly evolved spirits around wouldn't even discuss it with unless there were other people at their level. It must go on and on and on and on. That's what I'm saying. I agree. You go way down to the ignorance. We're grateful that completely they didn't think that they're thinking is them and they're doing and then you have the person questions. Well maybe there's something beyond the thinking. It just goes on endlessly and endlessly on and on and on and we just don't, tires start. It gets tires before it's too far to go get a bottle of whiskey and

Speaker 3

mj6-07:17

You were talking about the higher mind and the idea of healing people and people try to get psychiatric help. They can't really be helped because what they're trying, the way I see it is if the psychiatrist or psychologist doesn't recognize the possibility of a higher mind or another observation state, they're treating something that a person doesn't really like. You say there's no such thing as a mental illness. That's the date. Rather than getting behind it using re They can't get beyond the reflexes. Yeah, right Limits.

Speaker 2

mj6-07:55

That's all they see. A declaration almost collectively made a declaration today has to agree with that declaration that it's a physical brain in the sealable. A physical mind in a sealable with physical drugs. That's it. And I say that isn't that only up the you more up more has state of mind. All it does is it harnesses the symptoms that are the guys up you hitting with the drug and it knock him down. What happened to me? You get him down. What effect did that have on his long range? Right, right, right. Get him him off the street and then if you're lucky him a little bit to get him back to taxes,

Speaker 1

mj6-08:54

You probably something similar to that. If you were in an isolated condition, you fall over in the middle of a or something carted you off and what about this one line, the talk about, is that the same direct line? No,

Speaker 2

mj6-09:40

No.

mj6-09:43

Basically it depends on, you have to ask two possibilities. One of 'em is being one but I think he's talking about cutting out, being one with your inner self or no ego. No ego. This is the thing that always me about of all these egos, all these eyes perform a more dynamic and powerful what animals, good psychologist, but I definition of to be one you have to be minus everything, not unify all those personalities. You have to subtract everything but we observe personality best described what it's not correct. We do that. Proposed definitions of what it's not. They never tell you what it's, but still there's conscious. Even when you go within to state beyond the body and the mind still deep, there's still a consciousness of certain awareness. Oh sure, sure. But there's also states beyond that. The reason you have hope is because certain people have been surrounded dead at were brought back and they had a memory of things that happened dead. You also have people that were truly out technically unconscious information while they babbled, which was it's, I would think that if a person did travel this road, the only thing you could do would be bow his head and be aware of what I mean is to be aware of, doesn't matter what you do, you could be on karma.

mj6-12:22

Doesn't matter what you do, what you don't do. Absolutely t peace of mind to be trouble to be concerned. What happens got to come out in the world. Yeah. Reject. You can reject the world same time. Live in it if you want. Go by and it'll go by quickly. Not the has everybody there's, there's always a hangup for something that's got

way back, like I said, even have experience die alive to somebody. I think at that level there's certain things like passion and so forth where you, I don't mean being gift. Buddhism amazing.

Speaker 1

mj6-14:19

I got my grandfather about 95 told me don't take anything. I dunno if that's good for him to say. He must have been a smart,

Speaker 2

mj6-14:37

He was very smart. I see guy that's like a guy at 65

Speaker 1

mj6-15:10

Watching you. That's better.

Speaker 2

mj6-15:29

I am trying to be attached dec that's they've giving me hell Lately I've been kind of laying around lazy, working properly. It's like action and inaction

Speaker 1

mj6-16:25

Come and go. I hate to even

Speaker 3

mj6-16:30

I on like that because I don't usually talk that way. Humor, you're

Speaker 2

mj6-16:36

Out with a bunch of men. Their wife, they're dawning the husband like a, you ever hear of human liberation? That's where it's feminist because of the

Speaker 3

mj6-17:03

Sexist work. Whenever some woman says to me, I'm a feminist, then I say to her, but you're a sexist

Speaker 1

mj6-17:41

But why should you get through it? I mean look at all the

Speaker 2

mj6-17:44

Reinforcement you

Speaker 1

mj6-18:51

Okay? Direct mind a higher element being which is beyond the limitations attempt to beyond it while beyond thought. Direct mind experiences can occur as a result of test, so direct mind science should include the study of thought and such perception of emotions which can initiate direct mind experiences, direct mind the study that it should have as it center. However persons who are aware of direct mind, spiritual center to individual.

Speaker 2

mj6-19:45

One thing I wanted to mention you define, you're going to be the definitions given court. In other words, somebody says, do you know what does the guy say this stuff? This stuff isn't here because I'm here. There's not many thousands of incidents of direct mind, but this is

mj6-21:02

What we have to point to. Not particular. Particular. Of course if you want to a defamation, yeah. I'd say it's alright to say hey, pick up the contrast of illusion. Pick up the S book. Pick up psychology, but there's other books. The thing is somebody comes along and says, Hey, what do experience it for yourself more or less. Remove that whole thing until it is self, you don't care either have either experienced it or it's been pretty much laying down mathematical track. Okay, so what happens is what are we after the fact that somebody moves salt pepper and we know why. Okay, we're after the fact that somebody is healing somebody and we want to know why and are these common? Are there common denominators behind all these things and are we taking, is human waste taking the property approach to these things? Is there a mind?

mj6-22:45

You have to, all of this stuff has to come very carefully present a tremendous amount of phenomena with no explanation plausible except that you understand what I'm saying. In other words, it has to come out from the very basic beginning of, hey, my grandmother says my grandmother was able to remove wars. How did she remove wars? I'm not say my grand, somebody grand or the guy across the street did this. They did once, twice, twice. What happened? How did do this? We get out, were able to do strange and you go from there. You start to pile this up. You just can't say that this mind is an inferior mind. You can, but you're going to have to belabor your audience in things like corn press.

mj6-24:03

You're going to have to take contrast of and analyze and discuss it whether it can be this believable, whether it's worth or not, and Bob's book on the wisdom of the ole these things, Mary Baker, Eddie, this what happens here. If something results from, there must have been something result science practitioners now nothing. The movement would be dead. Something happens and then you get into these other things where footprint in the

ceiling or something upside down. Chapel. Chapel, nobody's making any money off of it. Colon dead, all sorts of stuff. That sense the man and the steel mill or the coal mine or the farm. You can talk to him and this is what you have to do. You have to talk to him On his basis. On his basis.

mj6-25:56

Columbus Allice lived down Charleston. He told a whole valley of people some one thing, some another and of course I was amazed. It goes back to yes, you mean this place exists, this fiction book talking. No, it's not a fiction book. Everything in it, everything in, check it out, no moved over just I don't want to stop you in the, I don't doubt still there, but check it out. One of the incidents that nice guy on the other hand was more muscular was if you pick up those names, those names or not, you have to plug what kind of did they in? Nothing real sensational, but they certain people had the ability to cause things to happen. They saw entities, group family, group family, some people here and there. He was kind surprised when he got outside there, so everybody, electricity, they work outside.

File mj7

Time: 18:33

Speaker 1

mj7-00:23

In a car, read a book while you went or meditate.

Speaker 2

mj7-00:44

It seems like in the past though, people were always working to just survive. If you had a wagon, had to have some way of feeding a horse and taking care of the animal, it's almost his whole life would be taken up doing the mundane things. But today it's not any better because you don't work all the time to make money to put food on your table, pay the taxes. I think the biggest drain on people's awareness is all the divergent television. That's what I'm

Speaker 1

mj7-01:24

Saying. Sports part Pittsburgh that cost a certain cost. Depreciation run over bucks. Freedom. If you don't trade it in every four years, you'll under repair. You make one trip to Pittsburgh life. What I'm talking about is personal experience. I can remember we lived right there where we lived down and we used to have visitors in the street and they put them all up for the night once a year family problem. But they had time to do that. There was no draw. Hard time passed the tide. The woman of the house had a piano. Piano was of the piano. The piano. But what I'm saying is those people lot the horses and sew stuff and still have more time. The world

mj7-04:38

I could see the reflection of because they this house we moved here. No, I think it used to be you had a desert, old men desert to against the long

mj7-05:46

Use. The old, including the old time religion in back then more people believed in traditional religion. A lot of that stuff was being challenged. Maybe there's some value in, I think there were challenges going against conformity to when I was a kid, I didn't see how question church or Oh yeah, you're talking about your family and my family. Other people did. This guy Martin Luther did this guy. They were knew. See that's what I always thought. The fact that old days early Christians were more quiet. But see, today you have all these writings that you have. You have all stuff back writing. Nothing was written before. 1500. Don't George, any that you make ride to escape, lead your own manufacturing of greater obstacles than that's what I think will happen Greater. Yeah. What you're doing, what we're trying to do, we're trying to escape. We're trying to pause five times technology, have

mj7-07:35

Books, computers, instantaneous information, computer, instantaneous information from all over the world by television all over the world. Yet we are getting more, not more materialistic. We're not even good animals. Average American. Somebody said that one out of seven people in this country. What One in five? That's supposedly it's one in five in the adult population. Stay I minutes. The same. One is two is a lot of goodness. I stopped buying it before her. This friend of mine lives, lives San Francisco. He's a female friend who she found out about her research started and I read an article in being spread by life in the communities where there are a lot of gay people.

mj7-10:56

All these weird new bacterial virus intestines, like these fatal diseases that mimic symptoms. Well here's what happens. Some of these men have mixed anal and oral and all kind of sex putting things where basically it's like how you e coli, that's for bacteria to get married to somebody claiming you. Lemme put it to you this way. I was not ever, on the other hand, I would not have long, so I mean I did get around some and I'll do it all kind of psychotic behavior. Especially in other words. Okay, but that's easy to answer. Just an emotional, I mean that I handled it. I had certain rules, but I accepted myself. For instance, I would not lie, I would not have myself lying.

mj7-13:29

I always put at least one menstrual period between, so I anything just so I would know. I had four myself. I, but now forget it because there's no way I don't have somebody then somebody carry You didn't know they have it and they didn't know They have it understanding. Well let's put it this way. The woman can see the organ and

there's nothing on it. She gets Explain that a friend mine you, somebody hass in their eyes. It looks like I collect this way. Frank Doesn't do his homework. I figured know. Sorry Frank, I'm this yourself. He asked his soul. Hey, it doesn't fantastic. Trying to capture some, we'll write it down in trailer. You shoulda I know. Answered.
