Note - Some page names will be adjusted after further investigation. Title of recording is [blue](#) if a page has been created, and **Pink** if not. Scroll down to see list. Conventions

Page name is generally comprised of Date + Title + Location. MediaWiki (this software) can have a "Talk" (Discussion) page behind each Article page (see link at top). These can be used to help sort out issues in identifying and cross-checking dates, alternate tapes of the same lecture, possible locations, etc., whatever needs to be discussed. See the "Categories" link (top of each page) for tags used for cross-referencing. Everything is a work in process and far from completion.
