To do

This is just a sketch. Timeline will help: <http://www.rosepublications.net/about.html>

Year 32 vs. 30

In early talks Rose said he had his experience at age 32. In later years after checking some dates, he realized it was at age 30, in 1947 (see correspondence in Robert Martin's book).

The following is from 1978-0406-Group-Meeting-with-Rose-Pittsburgh

"I was very angry when I was in my twenties. I didn't find anything until I was thirty. Thirty-two I think when it happened." [It was in 1947, age 30.]

So any time Rose says "30" it would be after 1978.

Try to track this, to find the exact date. It can help put a date on undated talks.
